## Education

- 
- **Hohai University (HHU)** **Nanjing, China**  
*B.Eng. in Computer Science and Technology* *08/2016--07/2020*  
GPA 88.76/100 (rank 8/107)

## Research Experience

- 
- **Video Intelligence Group, SmartMore Corporation Limited** **Shenzhen, China**  
*Vision Algorithm Intern* *12/2020--Present*  
- Worked on *Low-Level Computer Vision*, focus on Single Images & Videos Super-Resolution, supervised by Dr. **Nianjuan Jiang**.
  - **Image & Video Analysis Group, National Laboratory of Pattern Recognition(NLPR), Institute of Automation, Chinese Academic of Sciences** **Beijing, China**  
*Research Intern* *10/2019--10/2020*  
- Worked on *High-Level Computer Vision*, focus on Object Detection, Semantic Segmentation and Instance Segmentation in Images & Videos, supervised by Prof. **Jing Liu**.
  - **Institute of Science and Technology for Brain-Inspired Intelligence, Fudan University** **Shanghai, China**  
*Research Intern* *08/2019--02/2020*  
- Worked on randomized algorithms, graph-based learning algorithms, and high-dimensional time series modeling, supervised by Prof. **Jie Zhang** and Prof. **Kai Zhang**.
  - **Pervasive Computing Lab, College of Computer Science and Technology, Zhejiang University** **Hangzhou, China**  
*Research Intern* *07/2019--08/2019*  
- Worked on spatiotemporal data mining, graph convolution network, and time series modeling, supervised by Prof. **Ling Chen**.
  - **AI Development Group, College of Internet of Things Engineering, Hohai University** **Nanjing, China**  
*Research Assistant* *08/2018--07/2020*  
- Worked on *Computer Vision Application Development*, such as sports scoreboard recognition, bank card recognition, using JETSON NANO to deploy the trained model and so on, supervised by Prof. **Jianjun Ni**.

## Publications

- 
- **Juyong Jiang**, Jie Zhang and Kai Zhang. "Cascaded Semantic and Positional Self-Attention Network for Document Classification." *Findings of Empirical Methods in Natural Language Processing (EMNLP)*, 2020.
  - **Juyong Jiang**, Xingjian He, and Jing Liu. "SAMask: Self-Attention Network for High-Quality One-stage Instance Segmentation." **Writing in Progress**
  - **Juyong Jiang**, Kenkun Liu, Nianjuan Jiang, Jiangbo Lu, and Jiaya Jia. "Self-adaptive Local-global aware Transformer for 3D Multi-person Pose Estimation." **Writing in Progress**

## Patents

- 
- Junfeng Chen, **Juyong Jiang**, et al. "A fault diagnosis system for rail transit platform doors based on deep learning." *Chinese Patent. CN110262463A*, 2019
  - Jianjun Ni, **Juyong Jiang**, et al. "Bank card number positioning and recognition end-to-end method based on CNN and RNN." *Chinese Patent. CN110766001A*, 2019
  - Junfeng Chen, **Juyong Jiang**, et al. "Multi-regional precipitation prediction model construction method based on multi-graph convolution and memory network." *Chinese Patent. CN111126704A*, 2019

## Selected Projects

- **Video & Image Instance Segmentation Based on Deep Learning.** *03/2020--Present*
  - Predict both the location and the semantic mask of each instance in an image & video.
  - Add the module of ASPP, CoordConv, DCN, Global Pooling, Self-Attention, etc. on baseline framework to solve some problems and improve performance.
  - ✓ *IVA, NLPR, CASIA & HuaWei.*
- **Spatiotemporal Attention Probes Mechanism.** *09/2019--02/2020*
  - Establish Spatiotemporal Graph.
  - Use Query as a seed and then use the Markov Random Walk, Random Walk with Restart, Page Rank, etc. on Spatiotemporal Graph to form the interaction of neighborhood.
  - Combine the node information in the neighborhood to generate polarity features.
  - ✓ *Temple University & Fudan University.*
- **Spatiotemporal Data Mining in Smart Cities Based on Deep Learning.** *07/2019--08/2019*
  - Encode the non-Euclidean pair-wise correlations among regions into multiple graphs and then explicitly model these correlations using multi-graph convolution network.
  - Augments recurrent neural network with a contextual-aware gating mechanism to re-weights different historical observations.
  - Use a fully connected neural network to transform features into the prediction.
  - ✓ *College of Computer Science and Technology, Zhejiang University.*
- **Bank Card Recognition System Based on Deep Learning.** *03/2019--07/2019*
  - Data augmentation by using random cropping, rotation, various transformation, blur and noise.
  - Using CTPN & CRNN model to locate and recognize bank card number, respectively.
  - Developing a web page and an android app to display and use.
  - ✓ *College of Internet of Things Engineering, Hohai University.*

## Selected Awards & Honors

- Outstanding Bachelor Thesis in Jiangsu Province (**only 2 papers** in Department of Information), 2020.
- Excellent Bachelor Thesis Award in Hohai University (**5%**), 2020.
- Outstanding Student Honor in Hohai University (Two times), 2019, 2020.
- Top 10 Outstanding students in Hohai University, 2018.
- Excellent Grades in Trash Classification Challenge Cup of Huawei Cloud Artificial Intelligence Contest, 2019.
- National Encouragement Scholarship, 2018.
- Research and Innovation Excellent Scholarship in Hohai University, 2020.
- Spiritual Excellent Scholarship in Hohai University (Two times), 2019, 2020.
- Academic Excellent Scholarship in Hohai University (Four times), 2017, 2018, 2019, 2020.

## Mathematical Ability

- 2nd Prize for Certificate Authority Cup Mathematical Modeling Online Challenge (Two times), 2020.
- Honorable Mention for Mathematical Contest in Modeling, 2018.
- Honorable Mention for Certificate Authority Cup International Mathematical Contest in Modeling, 2017.
- Excellent academic grades in all mathematic curriculum. (Advanced Mathematics-A, Linear Algebra-A, Probability and Statistics-A, Mathematical Modeling-A, Numerical Analysis and Computing-A, Discrete Mathematics-A, Data Structure and Algorithms-A )
- Member of Mathematical Modeling Lab, Hohai University.

## Technical Skills

---

<b>Programming</b>	C / C++, Matlab, Java, Python, Shell, CUDA, LaTeX
<b>Web</b>	HTML / CSS, JavaScript, JSP, PHP
<b>OS</b>	Linux
<b>Framework</b>	Tensorflow, Pytorch
<b>English</b>	College English Test Band 4 / 6: 532 / 492; Duolingo English Test: 105
